

Eco Gloss

High Gloss Zinc-Free Floor Finish

Eco Gloss combines the best features everyone wants in a floor finish. It dries to a brilliant gloss with no buffing required and can be cleaned with a neutral detergent without dulling the gloss or removing the finish.

Multiple coats give a magnificent depth of gloss that does not yellow with age. Polished floors are easy to maintain.

Typical coverage is 1,200 - 1,500 sq. ft. per gallon.

DIRECTIONS:

Surface Preparation: If necessary, floor should be stripped free of old wax or finish using Detco's **Eco Strip**. Scrub floor thoroughly with a good detergent or neutral cleaner such as Detco's **Eco Mop**. Rinse well with clear water and allow to air dry thoroughly.

Application Procedure: Use with proper ventilation. Apply a thin, even coat of finish with a rayon mop or microfiber applicator. Allow at least 30 minutes of dry time. 2 to 3 coats are recommended for optimum performance. No buffing is required, but if the floor is to be buffed, wait at least 48 hours.

Maintenance: Sweep or damp mop every day to remove surface dirt. When damp mopping, use a neutral cleaner such as Detco's **Eco Mop**. Never use ammoniated cleaners for daily maintenance.

CAUTION

Wear safety glasses with side shields (or goggles).

Dispose of all waste generated from this product in accordance with all local, state and federal regulations. Please recycle this container.

This product meets Green Seal™ Standard GS-40 based on effective performance and protective limits on VOCs and human & environmental toxicity.
