

Crete Seal 25

High Gloss Concrete Sealer

Water-Based

Alkali Resistant

Long Wearing

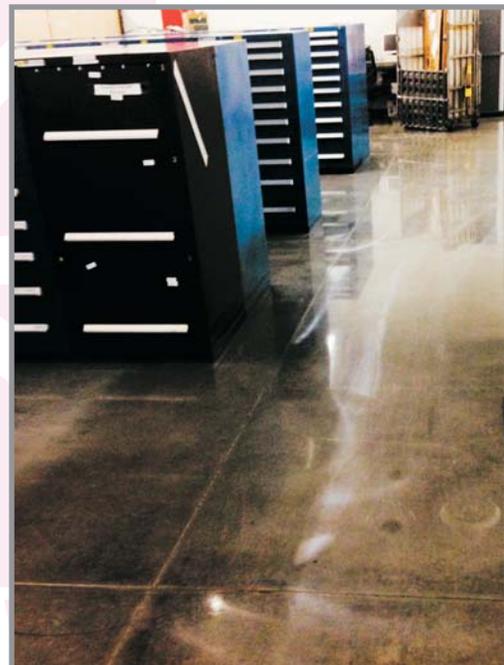

Machine Scrubbable

Low Odor

25% Solids

Crete Seal 25 is a water-based concrete sealer for use on most non-resilient floor surfaces including concrete, brick, and terrazzo.

Crete Seal 25 provides a high gloss finish and is machine scrubbable. It will make the surface water resistant, which will protect outside surfaces from harsh weather and help prevent the formation of cracks and spalls.

Concrete must be at least 28 days old before **Crete Seal 25** can be applied. Maintain with a neutral cleaner such as Detco's **Kwik Mop**.
